

I.C.ENGINEERING LIMITED

"The Electric Fence Specialist"

Electric Security Fence System

NON - LETHAL

I.C.ENGINEERING LTD are suppliers and installers of a High Voltage Electric Fence System proven to successfully deter unauthorized persons from entering your property.

PREVENT

Burglary

Breaches

Illegal Entry

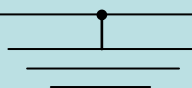

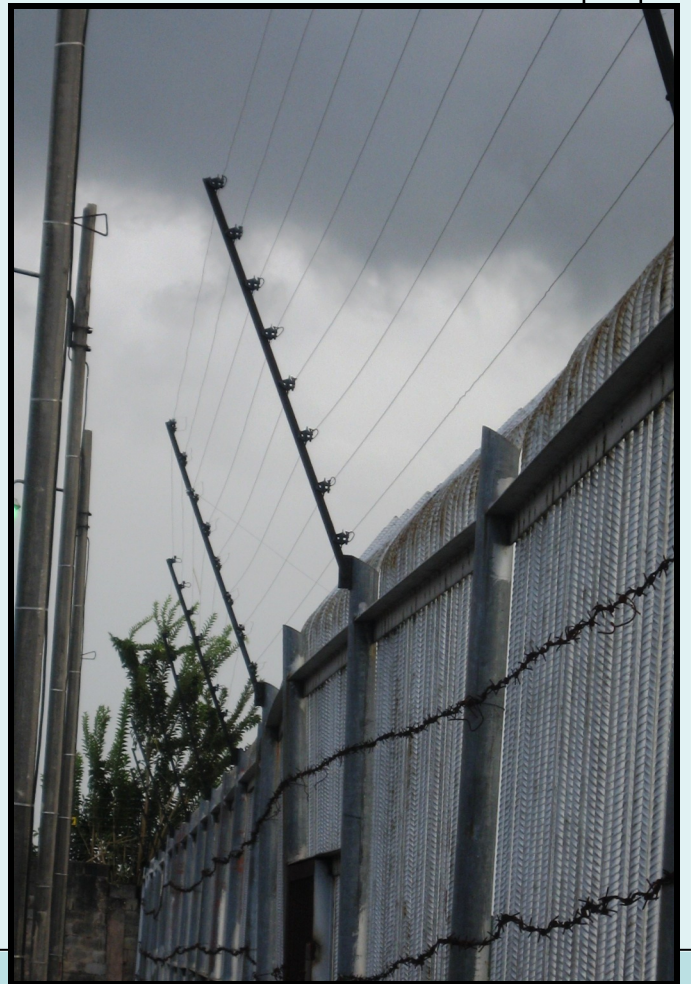

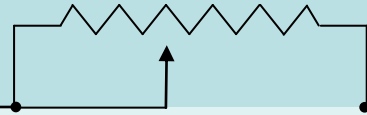

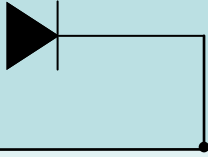

WHAT IS ELECTRIC FENCE?

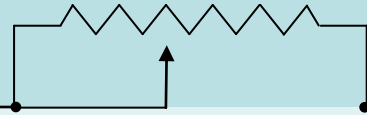

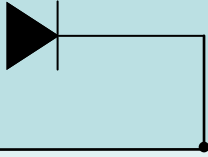

An electric fence takes electric energy from a power source and delivers it as a pulse. When someone touches the fence a short, sharp, painful but non-lethal, 10,000 volts shock, is received. It also acts as a psychological barrier rather than a physical barrier.

USES

- Less than a 40 watt Light Bulb
- 110 Volts
- 24 hr back up Battery Power

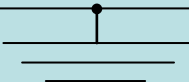

I.C.Engineering Ltd
complies with
International Safety
Standards
IEC 60335-1 and
**AS/NZS
3350.1.200**

HOW DOES IT WORK?

Every second, a very short-duration, safe, high-voltage pulse is discharged down the fence live wire. The voltage is monitored and checked by the energizer to ensure it is being maintained along the entire fence line. In the event of a voltage drop caused by either shorting, cutting or poor maintenance, the monitor will trigger the Siren and Strobe Light alarm, thus alerting you.

SAFE TO
Pets
and
Wildlife

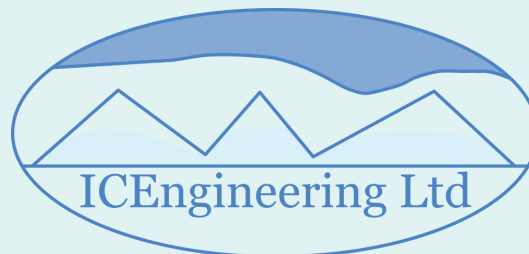

BENEFITS

- Cost Effective
- Easy to Construct
- Flexible Aesthetic Design
- Almost Invisible
- Legal
- Reduces multiple forms of security measures
- Environmentally Friendly
- Discourages Intruders
- Dependable
